

Varaždin Judicial Building
STAKEHOLDER ENGAGEMENT PLAN
Croatia: JUSTICE FOR BUSINESS PROJECT
October 2023

1. Objectives of the Stakeholder Engagement Plan (SEP)

- Build ownership over the project outcomes among key stakeholders to promote collaboration, enhance probability of successful outcomes through ensuring key stakeholder participation
- Start early in the project planning process in order for the initial feedback to be gathered from the participants and to enable modifications in the project design, as needed
- Reduce social risks that can negatively affect and/or jeopardize the improvement in access and efficiency of the court's infrastructure and expanding the use of electronic services in the justice sector through proactively identifying risks and concerns with stakeholders and preventing or mitigating these risks through transparent and agile communication channels.
- Provide guidance for stakeholder engagement.
- Identify key stakeholders that are affected, and/or able to influence the Project and its activities.
- Identify the most effective methods, timing and structures through which to share project information, and to ensure regular, accessible, transparent and appropriate consultation.
- Develop a stakeholders engagement process that provides stakeholders with an opportunity to influence project planning, design and implementation by generating structured channels for ongoing feedback from all project beneficiaries and partners (judicial staff, court users, court users that are persons with disabilities, etc)
- Establish formal grievance/resolution mechanisms;
- Define roles and responsibilities for the implementation of the SEP;
 - o Define reporting and monitoring measures to ensure the effectiveness of the SEP and periodical reviews of the SEP based on findings.

2. Principles of the SEP

Meaningful stakeholder engagement under this SEP is based on the following principles:

- Recognition that stakeholders are critical partners in project design and implementation and not just "beneficiaries"
- Communication is based on a two-way flow that goes beyond a "public-relations" or information dissemination campaigns (one-way flow)
- Adoption of transparent, agile and accessible means for informed participation by diverse stakeholders with varying means and capacities
- Is based on a structured process (instead of a sole event), allowing for stakeholders to become informed, process and analyse information, provide feedback, and receive reports back on whether and how their feedback was taken into account.

3. Key Content for Messaging

- **Objectives** of the Justice to Business project

The Justice for Business Project (J4B) aims to contribute to the establishment of a judicial system that will meet the highest European standards in terms of independence, impartiality, expertise and efficiency, thereby justifying the confidence of citizens and contributing to the progress of society.

- **Merits**

The Project has two components:

- Component 1 is a results-based component that supports implementation of interventions which are expected to reduce the administrative burden for businesses in their interaction with government.
- Component 2 includes direct investment supporting the refurbishment and/or reconstruction of court facilities in four selected locations: Judicial building in Varaždin, Municipal Civil Court in Zagreb and Municipal Courts in Kutina and Vinkovci. The component includes the preparation of detailed design for the selected court facilities, civil work supervision, and technical building audits.

Component 1 supports improvements in business regulatory services and market functioning in the construction sector. It comprises two subcomponents focused on: (a) removing regulatory barriers for market entry and operation, and (b) simplifying construction permitting and improving market functioning in the construction sector.

The objective of the Component 2 is to refurbish and/or reconstruct selected courts facilities to meet international standards of service allowing for better court performance and user experience. Furthermore, the aim is to improve the working conditions of the judicial bodies (courts and state attorney) located in buildings that will be refurbished and/or reconstructed by making them more energy efficient and functional in line with the Ministry of Justice and Public Administration (MoJPA) vision of a modern and efficient judiciary system.

- **The process** how stakeholders will be engaged to inform design and adaptations throughout project life cycle (i.e., SEP processes)
 Consultations with robust feedback mechanisms will be carried out consistently throughout project implementation, both for the results-based component as well as for the component on rehabilitation and renovation of selected court facilities.
 For the component on rehabilitation and renovation of selected court stakeholders are slightly different based on the stage of project implementation (prior to the commencement of the works, during construction, post-construction). Key activity of the engagement program is performing regular consultations with the management and staff of the judicial bodies in order to present the project, its objectives, activities, and related timeframe as well as the E&S framework, the Grievance redress mechanisms and to collect the level of satisfaction regarding grievance resolution. In addition, surveys conducted by professionals' services, will assess user satisfaction in the preparation phase (prior to the commencement of works) and during post-construction phase. Surveys will target management and staff of judicial bodies lawyers and bar

association, citizens and businesses, victims and witnesses, neighbouring buildings inhabitants, general public - all of the above including persons with disabilities. The same groups are the target to be reached during “court open days” that will be organised in each of the 4 facilities undergoing rehabilitation and/or upgrading. Surveys and open days are foreseen in the preparation phase and in post-construction phase per each location except for Zagreb where they will be implemented during preparation of phase II (and implementation/construction of Phase I) and in post-construction.

- **Key areas where the project can be influenced** by stakeholder engagement and related questions to spark feedback is the phase of developing designs for courts that will be refurbished and/or reconstructed (preparation of conceptual/main/detailed design for 4 selected court facilities)

4. Key Risks & Mitigation Measures

Key Risks	Mitigation Measures
<ul style="list-style-type: none"> - Court staff will not support project activities and will attempt to undermine its implementation - Court staff work environment and service for users will be negatively affected by construction works (e.g. interruptions in water supply, electricity, heat, air conditioning, exposure to dust, noise, dislocation of work offices, etc..) - Weak security organization of entrance into court during construction works - Labour management and OHS procedures are not implemented properly - Land issues are not resolved properly and on time - Lack of communication with nearby community (nearby community is not sufficiently informed about the project and is not aware of the grievance channels which leads to potential social tensions with local community and potential community health and safety risks - Lack of knowledge and thus awareness of key stakeholders on WPs ESF and related requirements - Lack of knowledge and awareness on 	<ul style="list-style-type: none"> - Prepare the ground well by designing a structured and proactive stakeholder engagement process and communicate all phases of the process and opportunities for participation & feedback - Design accessible channels for information requests & grievances - Conduct constructive and meaningful consultation process that will ensure stakeholders to provide feedback, and contribute to the design of courts - Report back on how feedback has been incorporated & grievances resolved - Present regularly project information and progress updates for different stakeholder groups using adequate stakeholder engagement and communication channels and tools - Conduct Intensive and transparent communication with relevant stakeholder on land issue and explore project design alternatives - Include ESF requirements in ToR and contract obligation of designers, contractors, supervising engineer, construction project manager and OHS specialist, inform them on

guidelines to design justice and court facilities	ESF and requirements during the phase, monitor implementation - Include relevant guidelines on design in ToR and contract obligation
---	---

5. Summary of previous stakeholder engagement activities

The judicial building in Varaždin is the fourth largest court in the Republic of Croatia and will host the County Court, the Municipal Court in Varaždin, the Commercial Court in Varaždin, the County State Attorney Office Varaždin and the Municipal State Attorney office Varaždin. The court building was built in 1963 and as such it does not meet the increased needs for the working space and is technologically outdated. Since the Court building is in the historic city centre, the MoJPA – in cooperation with the architect who designed the building – initiated the procedure of changing Urban Design Plan of the historic centre of the city of Varaždin to allow a new building extension of the County Court. The procedure has been satisfactorily completed and the Conservation Office (CO) approved the proposed design solution. The approved design is related to the construction of an additional floor of the existing judicial building. The new additional design would also increase the accessibility of the building to people with disabilities, increase the energy efficiency of the building, enable basic security measures with the system of technical protection of the building, adjusted the working spaces which will increase the efficiency of the work processes of the court and finally equip the building with new furniture.

The contract with the designer team that will develop the design (technical documentation) for the refurbishment of the building and the construction of the 3rd floor has been signed in November 2022 and it is foreseen that the design phase will last until December 2023. After the contract for design has been signed stakeholder activities included as follows:

- Meetings with management staff of the judicial bodies (court presidents), to present and discuss sub-project initial design and solicit initial feedback, clarify doubts, present project GRM mechanisms and means of communications. The management staff of the Court has been solicited to collect needs from the staff of the judicial bodies that will be hosted in the building with focus on vulnerable groups (particularly persons with disabilities, victims and witnesses).
- Meetings with local authorities in order to assure their timely feedback on initial design and obtain their conditions for further development of the technical documentation.

6. SEP Action Plan

STAKEHOLDER ENGAGEMENT PLAN	
Pre-construction phase/design preparation phase <i>Timeframe: November 2022 – March 2024</i>	
Objective:	<ol style="list-style-type: none"> 1. Consult & inform key stakeholders to provide meaningful & constructive feedback 2. Gather information relevant to adequately inform sub-project design (identification of needs, potential risks and impacts, suggestions for improvement)
Activities of Pre-construction phase/design preparation phase:	<ol style="list-style-type: none"> 1. Identification and mobilization of key stakeholders 2. Conducting stakeholder engagement (meetings, surveys, open days etc) 3. Preparation of comms Tools (PPTs of sub-projects design, press releases, information on Ministry’s web-site, etc) 4. Raising awareness and ensuring functioning of project GRM
Inputs for Pre-construction phase/design preparation phase:	<ol style="list-style-type: none"> 1. Program of outreach for the sub-project level 2. Comms Tools: Summary on sub-project ,PPTs on sub-project design, surveys 3. Articulation of key stakeholders, benefits & risks of sub-project implementation 4. Incident and accidents procedure 5. Project GRM
Outputs/ Pre-construction phase/design preparation phase:	<ol style="list-style-type: none"> 1. Summary of feedback received during stakeholder engagement 2. Identification of critical risks and benefits of sub-project implementation based on stakeholder feedback 3. Identification of Recommendations/Revisions to incorporate into sub-project design when feasible 4. Informed Stakeholder Groups to Provide Meaningful Feedback during Construction phase 5. Revised Comms Tools based on feedback received during pre-construction phase 6. Incidents and accidents procedures developed

Stakeholder Analysis for Pre-construction phase/design preparation phase					
Stakeholders	Benefits	Risks	Key Messages	Areas where Feedback is Sought	Methods for Engagement
Management staff of the judicial bodies (court presidents, chief of the state attorney office)	<ul style="list-style-type: none"> - Manage a higher quality/modern court. - Satisfied judicial staff due to the enhanced working environment. - Improvement in judicial access and efficiency of the court's infrastructure reflects in better service delivery. 	<ul style="list-style-type: none"> - Resistance from court employees due to potential impact of construction work on their working conditions (noise, dust, interruptions in heating, possible relocation, etc) - Additional workload as a focal point for communication sub-project activities with judicial staff, PIU and Ministry 	<ul style="list-style-type: none"> - Will be actively involved in design of refurbishment and/or reconstruction. - Efforts will be made during design and construction phase to avoid relocation and limit the impact of construction work on work environment (dust, noise etc.) - Improved judiciary service 	<ul style="list-style-type: none"> - Risks - Benefits - Technical documentation / design - Critical Info Needs - Interest/Concerns and conditions to participate in sub-project implementation. - Grievances and level of satisfaction regarding grievance resolution or non-resolution 	<ul style="list-style-type: none"> - Meetings with management staff of the judicial bodies (court presidents), to present and discuss sub-projects design and solicit initial feedback, clarify doubt. - Preparation of materials with main information on sub-projects to support court presidents in implementation of the sub-project within their court. - phone, and e-mail communication - surveys

			delivery and efficiency		
Judicial staff (judges, court advisors, clerks, other court staff, personnel of the state attorney office)	<ul style="list-style-type: none"> - Opportunity to influence and contribute to court design improvement - Enhanced working environment - Improvement in judicial access and efficiency of the court's infrastructure will enable better service delivery and more satisfied court users 	<ul style="list-style-type: none"> - Dissatisfaction with the final design (when meeting all the needs is not feasible) - Dissatisfaction due to the potential impacts that may be caused by construction works 	<ul style="list-style-type: none"> - Will be informed on design of refurbishment and/or reconstruction - Sub-project level GRM established to submit complaints, feedback, queries, suggestions or compliments during design and construction phase - Measures undertaken to toward grievance resolution and complaint 	<ol style="list-style-type: none"> 1. Technical documentation / design 2. Needs 3. Grievances and level of satisfaction regarding grievance resolution or non-resolution 	<ul style="list-style-type: none"> - Meetings and consultations with court staff, to present and discuss sub-project design and solicit initial feedback, clarify doubts - Presentation of conceptual/main/detailed design - Surveys - open days

			feedback		
Judicial police staff	<ul style="list-style-type: none"> - Enhanced working environment including through improvement of safety and security measures 	<ul style="list-style-type: none"> - Dissatisfaction with the final design (when meeting all the needs is not feasible) - Dissatisfaction due to the potential impacts that may be caused by construction works (i.e. cold / hot weather, complications in providing security) 	<ul style="list-style-type: none"> - Will be informed on design of refurbishment and/or reconstruction - Sub-project level GRM established to submit complaints, feedback, queries, suggestions or compliments during design and construction phase - Measures undertaken to toward grievance resolution and complaint feedback 	<ul style="list-style-type: none"> - Technical documentation / design - Needs - Grievances and level of satisfaction regarding grievance resolution or non-resolution 	<ul style="list-style-type: none"> - Meetings and consultations to present and discuss sub-project design and solicit initial feedback, clarify doubts - Presentation of conceptual/main/detailed design - Surveys - Open days

Persons with disabilities	- Court buildings designed to minimize barriers for persons with disabilities	- Dissatisfaction with the final design (when meeting all the needs is not feasible)	- Sub-project level GRM established to submit complaints, feedback, queries, suggestions or compliments during design and construction phase	- Grievances and level of satisfaction regarding grievance resolution or non-resolution -	- Meetings - Surveys - Open days - Web site (MoJPA, Court)
Victims and witnesses	- Court buildings designed to minimize contact with offender, improve safety and privacy	- Dissatisfaction with the final design (when meeting all the needs is not feasible)	- Sub-project level GRM established to submit complaints, feedback, queries, suggestions or compliments during design and construction phase	- Grievances and level of satisfaction regarding grievance resolution or non-resolution -	- Meetings - Surveys - Open days - Web site (MoJPA, Court)
Local authorities	- Greater efficiency of the courts and	- Complaints from project	- Improved judiciary	- Grievances and level of	- Meetings and consultations with local authorities, to

STAKEHOLDER ENGAGEMENT PLAN

Post-construction phase

Timeframe: starting with May 2025

Objective of Post-construction phase:

1. Collect productive and meaningful feedback from key stakeholders on the satisfaction of completed refurbishment and/or reconstruction and the level of improvement of judicial services
2. Collect productive and meaningful feedback from key stakeholders on the sub-projects implementation (i.e. the way sub-project design and construction phase were implemented)
3. Collect productive and meaningful feedback from key stakeholders on the level of satisfaction on grievance resolution during construction phase

Activities of Post-construction phase

1. Mobilize/implement post construction phase communications activities
2. Conducting stakeholder engagement (surveys, open days)
3. Collect, systematize, analyse and prepare responses on feedback received

Inputs for Post-construction phase:

1. Program of outreach for the sub-project level (i.e. open days program)
2. Communication Tools: Summary on sub-project, PPTs, surveys, press releases

Outputs/Outcomes of Post-construction phase:

1. Summary of feedback received during stakeholder engagement
2. Identification of Recommendations/Revisions to incorporate into sub-project design in future project

Stakeholder Analysis for Post-construction phase

Stakeholders	Benefits	Risks	Key Messages	Areas where Feedback is Sought	Methods for Engagement
Management staff of the judicial bodies (court presidents,	<ul style="list-style-type: none"> - Manage a higher quality/modern court - Satisfied judicial 	<ul style="list-style-type: none"> - Resistance from court employees due to potential lack of satisfaction of works 	<ul style="list-style-type: none"> - Improved judiciary service delivery and efficiency 	<ul style="list-style-type: none"> - Grievances and level of satisfaction regarding grievance 	<ul style="list-style-type: none"> - Meetings with management staff of the judicial bodies - phone, and e-mail communication - surveys

chief of the state attorney office)	<p>staff due to the enhanced working environment</p> <ul style="list-style-type: none"> - Improvement in judicial access and efficiency of the court's infrastructure reflects in better service delivery 	conducted (refurbishment and/or renovation)		<p>resolution or non-resolution</p> <p>–</p>	
Judicial staff (judges, court advisors, clerks, other court staff, personnel of the state attorney office)	<ul style="list-style-type: none"> - Enhanced working environment - Improvement in judicial access and efficiency of the court's infrastructure will enable better service delivery and more satisfied court users - Opportunity to influence and contribute to court design improvement 	<ul style="list-style-type: none"> – Resistance from court employees due to potential lack of satisfaction of works conducted (refurbishment and/or renovation) 	<ul style="list-style-type: none"> – Sub-project level GRM established to submit complaints, feedback, queries, suggestions or compliments during design and construction phase – Measures undertaken to toward grievance resolution 	<ul style="list-style-type: none"> – Grievances and level of satisfaction regarding grievance resolution or non-resolution 	<ul style="list-style-type: none"> - Meetings and consultations with court staff, - Surveys - open days

			and complaint feedback		
Judicial police staff	- Enhanced working environment including through improvement of safety and security measures	- Resistance from court employees due to potential lack of satisfaction of works conducted (refurbishment and/or renovation)	- Improved security and safety conditions after implementati on of work	- Grievances and level of satisfaction regarding grievance resolution or non-resolution	- Meetings and consultations with court staff, - Surveys - open days

7. Grievance Redress Mechanism (GRM)

A Grievance Redress Mechanism (GRM) is a process for receiving, evaluating, and addressing project-related complaints, feedback, questions and suggestions from citizens and affected communities at the level of the project. The mechanism focuses not only on receiving and recording complaints but also on resolving them. While feedback should be handled at the level closest to the complaint, all complaints should be registered and will follow the required procedures.

Key definitions of grievance and complaint are as follows:

- Complaint: an expression of dissatisfaction that is related to an impact caused by a project activity, which has affected an individual or group. Adversely, the interests of an individual or group and the individual or group want a proponent or operator (or contractor) to address and resolve it (e. g. problems related to dust deposition, noise or vibration). A complaint is normally of a less serious nature than a grievance;
- Grievance: a claim raised by an individual or group whose livelihood, health and safety, cultural norms and heritage are considered to have been adversely affected by a project activity which, if not addressed effectively, may pose a risk to operations (through stakeholder actions such as access road blockages) and the livelihood, well-being or quality of life of the claimant(s). The grievance mechanism described in this section includes both complaints and grievances.

GRM mechanisms will be presented during regular meetings held with Management staff of the judicial bodies during design and during surveys and open days that will be held during preparation and post-construction phases. GRM related obligations are included in procurement / bidding procedures for acquiring services of technical design, supervising engineer, construction project management, occupational health and safety (OHS) specialist and every other relevant service as well as during construction (contractor and subcontractor obligations).

The point of contact regarding grievance management is the PIU Social Specialist:

Marija Herceg Selandari

Marija.HercegSelandari.ext@mpu.hr

The point of contact for submitting initial grievance at the level of the subproject during construction phase is the contracted supervising engineer that has the obligation to register, report, and track grievances in the location specific grievance log. The PIU Social Specialist, PIU members, if relevant, MoJPA staff, will determine whether the complaints warrant further consideration as a relevant grievance. If the matter has standing, grievance information will be registered, reported, and tracked in the project grievance log by the PIU Social Specialist.

CROSS CUTTING: Project Level Grievance Redress Mechanism (GRM)			
<p>Types of potential grievances:</p> <ul style="list-style-type: none"> - Dissatisfaction on the choice of the facilities - Dissatisfaction on the timeline of the implementation of project activities (they are not implemented in timely manner) - Dissatisfaction with the final design of refurbishment / reconstruction of selected facilities in terms of including ESF requirements and relevant guidelines for judicial infrastructure 	<p>Process to Record, Process, Resolve, and Report:</p> <p>Once a grievance is received, the PIU Social Specialist, PIU members and, if relevant, MoJPA staff, will determine whether the complaints warrant further consideration as a relevant grievance. If the matter has standing, grievance information will be registered, reported, and tracked in a grievance log by the PIU Social Specialist. The information recorded in the Grievance log include: name of complainant (if treated as non-confidential), location and address of Complainant (if available), grievance description, level of impact, person responsible for managing the grievance, findings of grievance investigation, description of measures undertaken to settle the grievance, feedback from Complainant on level of satisfaction regarding grievance resolution or non-resolution, date of acknowledgement of receipt and of settlement response, status.</p> <p>All grievances will be acknowledged within 7 days; and responded to no later than 30 days. Annex – Project description and project components

The Justice for Business Project (J4B) aims to contribute to the establishment of a judicial system that will meet the highest European standards in terms of independence, impartiality, expertise and efficiency, thereby justifying the confidence of citizens and contributing to the progress of society.

The Project has two components:

- Component 1 is a results-based component that supports implementation of interventions which are expected to reduce the administrative burden for businesses in their interaction with government.
- Component 2 includes direct investment supporting the refurbishment and/or reconstruction of court facilities in four selected locations: County Court in Varaždin, Municipal Civil Court in Zagreb and Municipal Court in Kutina and Vinkovci. The component includes the preparation of detailed technical documentation - design for the selected court facilities, civil work supervision, and technical building audits.

The Component 1 supports improvements in business regulatory services and market functioning in the construction sector. It comprises two subcomponents focused on: (a) removing regulatory barriers for market entry and operation, and (b) simplifying construction permitting and improving market functioning in the construction sector.

The objective of the Component 2 is to refurbish and/or reconstruct selected courts facilities to meet international standards of service allowing for better court performance and user experience. Furthermore, the aim is to improve the working conditions of the judicial bodies (courts and state attorney) located in buildings that will be refurbished and/or reconstructed by making them more energy efficient and functional in line with the Ministry of Justice and Public Administration (MoJPA) strategy of a modern and efficient judiciary system.

Table: J4B Project Components

Component 1: Reducing the administrative burden for businesses to interact with Government	
Subcomponent 1.1.	Removing regulatory barriers for market entry and operation
Subcomponent 1.2.	Simplifying construction permitting and improving market functioning in the construction sector
Component 2: Improving justice services for businesses	
Subcomponent 2.1.	Expanding the use of electronic services in the justice sector
Subcomponent 2.2.	Improving efficiency of dispute resolution in municipal and commercial courts (including second instance courts)
Subcomponent 2.3.	Rehabilitation and upgrading of selected court facilities
Subcomponent 2.4.	Strengthening Public Investment Management practices in the judiciary
Component 3. Project Management
